

Importance of Getting a **Pap Test.**

# Importance of Getting a **Pap Test**.

Cervical screening (e.g. Pap test) can successfully detect pre-cancer cells which can effectively be treated to prevent cancer.

HPV causes cervical cancer. With regular screening, appropriate and timely follow-up and HPV immunization, **cervical cancer is almost entirely preventable.**

There are over 1300 cervical cancer cases every year in Ontario.  
**Cervical cancer can be prevented.**
